I322 Acrylic Master Kit

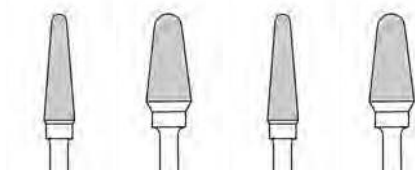

Das Acrylic Master Kit für die Bearbeitung aller Kunststoffe und Gipse. Durch die neue Facettenverzahnung mit Kreuzverzahnung und optimierter Spannutt wird das Material schneller und glatter abgetragen. Eine anschließende Politur wird somit erleichtert.

The Acrylic Master Kit for use on all types of acrylic, plastic and gypsum. Because of the new facet cutters with cross cut and optimal chip-flute the material can be removed faster and more evenly. A subsequent polishing is herewith made easier.

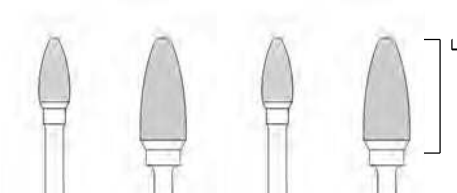

El fresero Acrylic Master Kit para trabajar en todas las resinas acrílicas y yesos. Gracias a los novedosos filos beselados con dentado cruzado y las ranuras apropiadas para expulsar las virutas el tallado del material es más rápido, dejando al mismo tiempo una superficie más suave para facilitar el pulido posterior.
